MEASURE

Observation with an optimal balance of brightness and clarity

The VHX Series has a depth of field that is 20 times greater than conventional optical microscopes. KEYENCE designs the lenses, cameras and graphic engine in-house, enabling observation with an optimal balance of depth and brightness. Even novice users can capture high resolution images with ease.

Large depth of field
Hand-held observation

Images can be saved and shared easily

With a 1 TB hard drive, images are easily saved locally.
Images can be shared over LAN or a USB drive.
Reports can be automatically created and shared.

Easily save and recall images
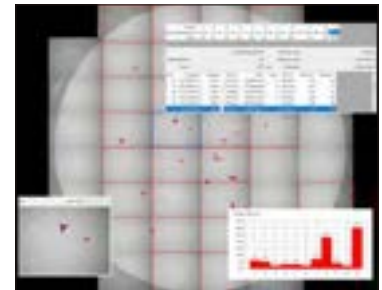

Automatically generate reports

Perform a wide variety of measurements with just one device

Easily perform 2D and 3D measurements. Roughness, contamination, grain size, and other measurements can be performed with one tool.

3D measurement

Contamination analysis

The VHX Series offers observation that exceeds conventional imaging tools. With advanced measurement capabilities,
this system enables a variety of analyses. Expanded memory capacity allows for storage of millions of images. Its easy-to-use interface can be used effectively by expert and novice users.
The VHX Series is equipped with all of the features needed to enhance your analysis.

View, capture and measure with an all-in-one system

4K monitor

Easier Operation and Higher Resolution Images

The VHX-7000N represents a new era of digital microscopy

Delivering images that rival an SEM

High-resolution (NA 0.9) HR lens

Combining resolution high enough to support 4K image quality with a large depth of field, these new dedicated lenses for digital microscopes push the envelope of optical performance.

2500× to 6000×

100× to 500×

20× to 100×

500× to 2500×

Automatic zoom from 20× to 6000×

Observation can be carried out automatically at magnifications from 20× to 6000× without changing the lens. Magnification-switching can also be carried out quickly using either the mouse or the handheld controller.

Magnification is changed automatically

Low magnification

High magnification
Controls are now even simpler and more convenient to operate

High-speed auto-focus stage

Focus view camera

Motorized eucentric stage

VHX

Full-control system enables even novice users to capture optimal images

The user simply places the target on the stage, and everything else – including alignment, focus adjustment, magnification switching and so on – is fully automatic.
Even first-time users can perform observation perfectly on the desired area, with no stress at all.

All the controls are at your fingertips

Building on the high operability of previous models, this new VHX Series delivers intuitive focus adjustment using Focus View and a motorized stage. Additionally, magnification switching can now be performed using the handheld controller or the mouse.

The Focus View function enables easy focus adjustment, viewed from the side

This is the first model to feature the Focus View function, which enables simultaneous viewing of the lens and the target. Thanks to the intuitive software interface, focusing can be carried out easily with just a click.

Automatic multi-point capture and measurement available

Using the Auto-Measurement Teaching function, repeated measurements can be performed automatically on identically-shaped samples. Not only XYZ coordinates, but also magnification and lighting settings are reproduced automatically.
Lighting and Observation Functions

Optimal lighting patterns are captured automatically

Omnidirectional lighting data is captured automatically

Multi-lighting

With the Multi-lighting function, omnidirectional lighting data is captured the click of a button. The image most suitable for observation can then be selected from among this data.
This eliminates the need to endlessly adjust the lighting settings in order to obtain a clear image.

Lighting can be changed flexibly even after recording

The lighting data is retained with the saved image. The lighting can be changed by using the mouse to move the lighting icon.

Lighting can be changed even after saving the image to a PC

Normal image
Multi-lighting

Normal observation

Ring removal

Ring removal

Eliminating glare

By capturing multiple images with different lighting, an image free of glare can be obtained. It has historically been difficult to remove the ring-shaped reflections that can appear on the target surface.
With the VHX-7000N, these rings can be removed at the click of a button.
Normal observation
HDR observation

HDR observation

Enhanced Color and Contrast

The High Dynamic Range (HDR) imaging function captures multiple images at varying shutter speeds to obtain an image with high color gradation. This enables observation at previously unattainable levels of accuracy and contrast.

Depth Composition and Image Stitching

Always view your target fully in focus

Fully focused imaging anywhere on your sample

Real-time composition interface

On an overall image of the target, simply click on the area you wish to view. The stage will then automatically move to the selected location, and depth composition will be carried out until the area is in focus. All the manual adjustments required in conventional systems have been eliminated, dramatically reducing the time and effort required for observation.

In the Navigation window
(wide field, low magnification),
click on the area you want to view

Fully focused image wherever you look

The real-time composition interface will automatically and instantly bring any area into focus

Stage moves on X and Y axes
The stage moves to align itself with the area you clicked on the interface screen.

Lens moves on Z axis
Depth data collected for fully focused imaging.

Depth compositing
A fully-focused image is created
High-magnification observation range is now 800 times larger

High-speed image stitching (with up to 6 times more data than conventional systems)

When you press the Image Stitching button, the image is automatically stitched together. Stitching can be performed quickly over large areas, and can be used to create a high-resolution image of a wide area. Image stitching can handle up to 50 thousand pixels vertically by 50 thousand pixels horizontally.

BGA (100x)

Up to 50,000 pixels

Up to 50,000 pixels

Conventional field of view

1536 pixels

2048 pixels
3D image stitching

By capturing multiple images while the stage is moving, 3D data capture and stitching can be performed simultaneously. This makes it possible to view and analyze the overall contours of the target. Surface irregularities can also be measured.

Seamless stitching is possible

In the stitching process, conventional methods can have brightness variations across the resulting image. The VHX Series auto correction eliminates this variation for uniform lighting across the image.

3D profile measurement

Conventional image

Image using Auto Correct
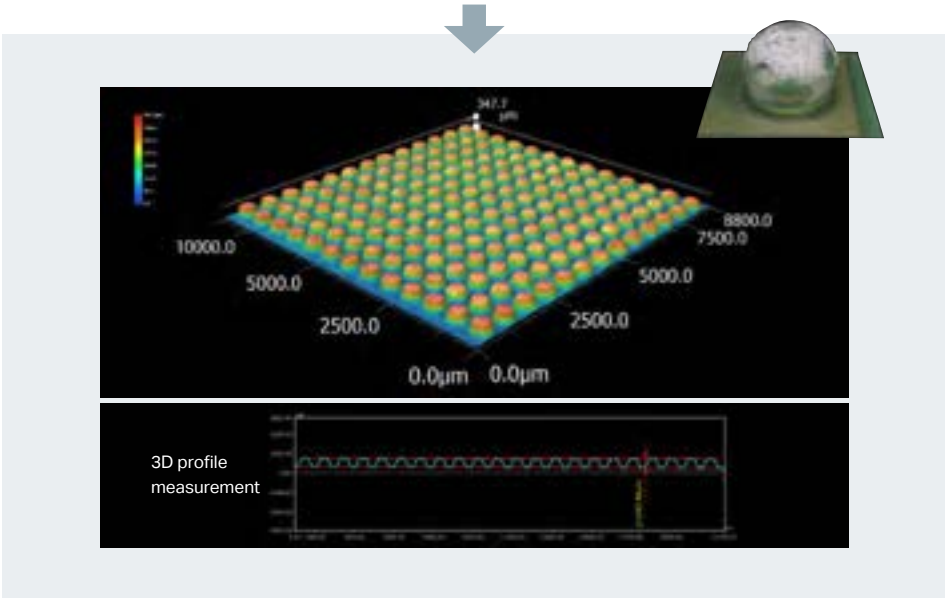

Recording Function

Capture parameters are stored with the image

Data can be recorded at the touch of a button and shared instantly

Saving data

Your measurement data is safe, no matter how much time passes, because you can save not only images, but also the measurement results, observation conditions and other data from when the images were captured. Also, by connecting your VHX system to a network, you can share data throughout your company, making the system even more useful.

Report function

You can install Excel on your VHX system, just like on a PC. By setting up templates in advance, you can easily convert observed images and measurement results into reports.
Reproduction of image capture settings

Image capture settings can reproduced by simply selecting the image from an album. Observation can be carried out again under the same conditions, and the results will be consistent, even if it is performed by a different person at a later date.

Don't just save the image: save the capture settings

Automatic recognition

Lens connection

Lens type

Observation magnification

Automatic magnification recognition

Magnification must be accounted for when making measurements, so the magnification needs to be selected correctly at the time of observation. To eliminate selection errors, the VHX system recognizes the magnification automatically. It also identifies the lens connected, and increases measurement accuracy with our calibrated lens.

One-push calibration

Simply installing a dedicated scale and performing a one-click operation automatically calibrates each lens.
This operation is simple and can be carried out correctly even by novice users, ensuring accurate calibration.

Traceability

Certification is available for our dedicated calibration scale, providing confidence in your operation.

Measurement Functions

Measure as you view

> A variety of easy,
> accurate measurement
> functions

2D measurement

Using simple mouse operations, a wide range of measurements – including distance between 2 points, angle, diameter, parallel lines, area and so on – can be performed on the screen in real time. Once the image has been saved, additional features can be measured at a later time. With free communication software, anyone can use the measurement functions with ease on their own PC.
Wide variety of measurement tools

18 basic measurements plus 11 advanced measurement tools are provided.
Automatic edge detection eliminates human error

In a conventional system, the user has to determine the edge alignment, and each individual will do it slightly differently. The VHX-7000N uses the latest automatic edge detection function to eliminate variation in manual measurements. The shape is identified using contrast allowing for consistent measurements between individuals.

About 100 points are detected automatically

Shape is identified from detected points using least-squares method
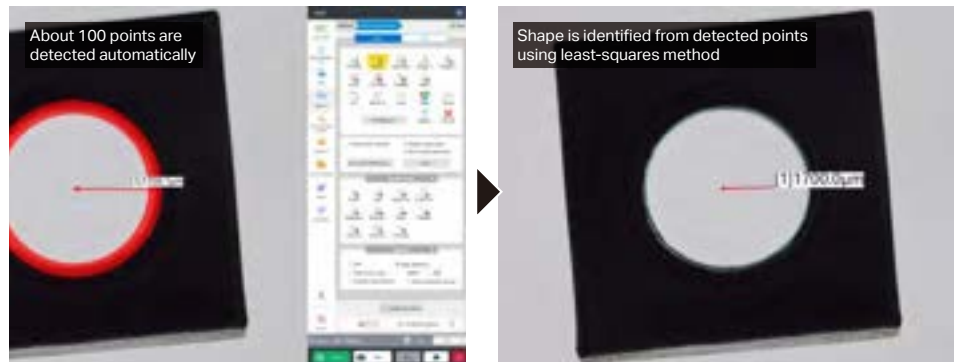

Easy measurement of everything from 3D contours to surface roughness

3D measurement

Even when the target has an uneven surface, a fully-focused image is obtained instantly, composed from multiple images with varying focus positions. Additionally,
3D display can be used to observe surface contours.

Contour analysis

Roughness analysis
Screw thread (100x)

High-accuracy conversion to 3D using KEYENCE's Accurate D.F.D. 2.0 method

By estimating height based on subtle variations in texture, a 3D image is constructed. KEYENCE's noise elimination software allows for accurate shape production.

Conventional image

Image using Accurate D.F.D. 2.0

Bolt

Auto Adjust function allows depth composition even when imaging at an angle

When images are captured, the Auto Adjust function automatically compensates for the edge displacement and vibration that can occur during image capture. The system then goes on to construct a highly-comprehensive, fully-focused image. The composition can include images captured from an angle.

Conventional image

Image using Auto Adjust function

---

Contamination analysis
compliant with
ISO 16232 and VDA 19

Contamination analysis

The VHX-7000 Series enables you to carry out contamination analysis compliant with the ISO 16232 and VDA 19 cleanliness inspection standards covering the automotive industry. Large depth-of-field images captured at high resolution using the VHX-7000N can be analyzed, enabling accurate measurement, even when the target has an uneven surface.
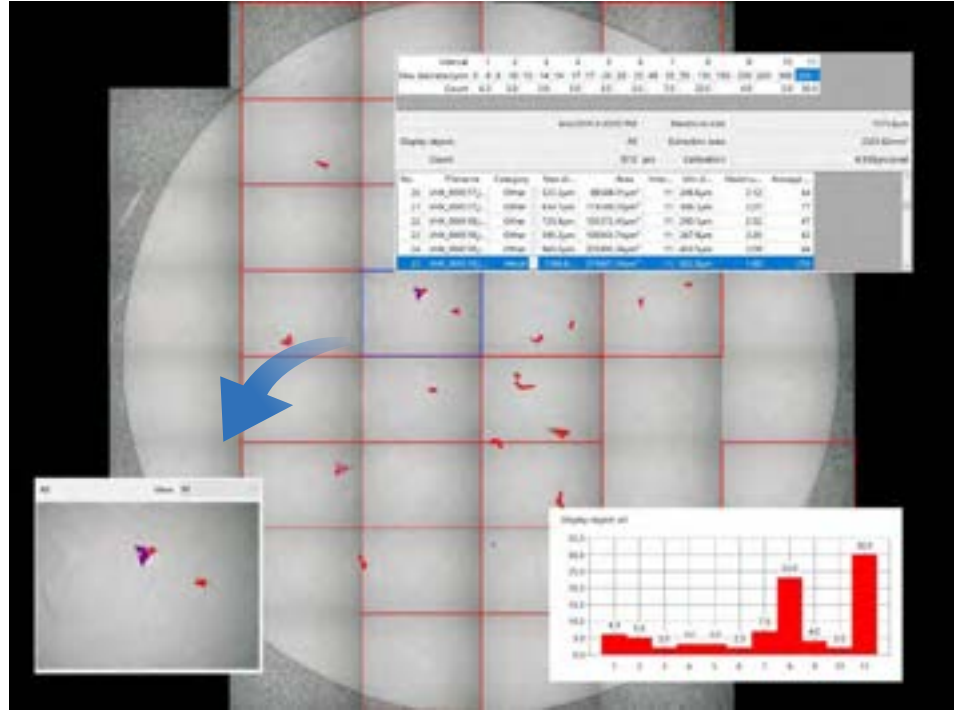

Membrane filter (50x)

Detailed Analysis mode

When a particular contamination area is selected on an image of the whole filter, the stage automatically moves to that area. The magnification can be increased instantly to allow detailed observation, simplifying the process of identifying foreign particles and making the operation more efficient. This mode can also be used for depth composition and 3D height measurement.
Grain Size Measurement and Analysis

Calculate grain size for any sample completely to ASTM standards, and automatically save the results or easily export the data into a report. Our latest software offers quick and automatic analysis that eliminates the user's need to manually count grains or perform 'Chart Comparisons'. Users can also save their workflow for fast and repeatable measurements.
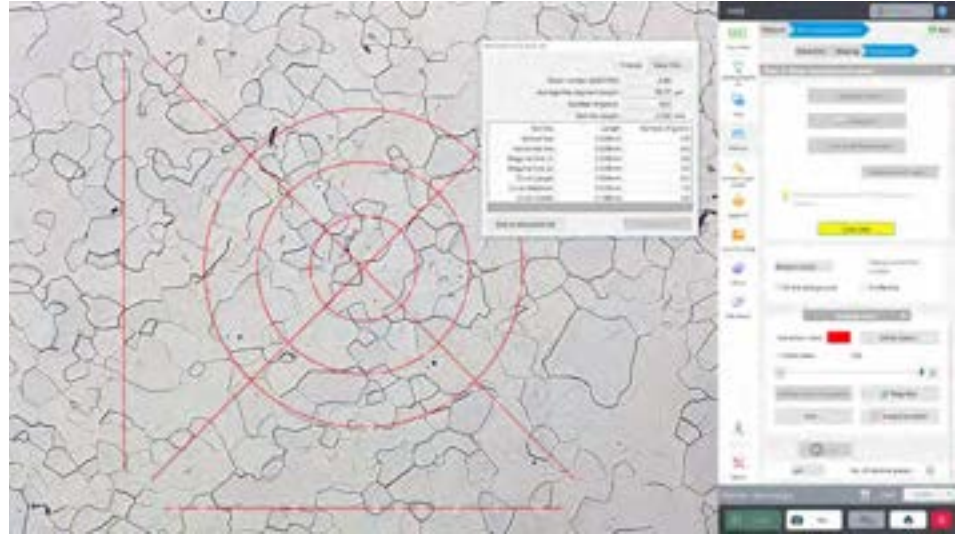

Particle analysis   Starch (400x)
Crystal grain size measurement   Metal structure (800x)
Maximum area measurement   Probe mark (1000x)

Advanced image analysis is fully automatic

Automatic area measurement/ count

In an easy operation, area measurements and counts can be carried out within a specified range on the target. Targets that are not required can be excluded, and overlapping targets can be separated. Even when performed by novice users, the operation will still yield highly accurate analysis results.

Versatile stage system accommodates a wide range of targets

Free-angle observation system with XYZ motorized stage
VHX-S750E

Adjustment mechanisms allow easy field-of-view alignment, rotation, and oblique axis motion. Eucentric design ensures that the target stays centerd in the field of view, even if the lens is tilted or rotated.

LED-transmitted illumination

LED-transmitted illumination is provided as standard, enabling clear observation throughout the range from low to high magnification.

Rotation sensor

The built-in rotation sensor identifies the rotation position from the stage. Even when rotated, the stage moves in the direction shown on the screen.

Handheld controller

The handheld controller makes it easy to move the stage on the XY axes and on the Z axis.

100 × 100 mm 3.94" × 3.94" large XYZ motorized stage
VHX-S770E

To meet the need for larger observation ranges and to accommodate large samples, we have released a 100 ×100 mm 3.94" × 3.94" large XYZ motorized stage.

In response to customer requests, this system is now compatible with several special large-scale stages.

*The special stages shown below are not KEYENCE products.

XY measurement system compliant with traceability standards
VH-M100E

This XY measurement system ensures highly reliable measurements based on a traceability system underpinned by Japan's national standards. Additionally, the manual stage can be moved to extend the measurement range beyond the maximum 100 × 100 mm 3.94" × 3.94" field of view.

Backlighting unit OP-84484

Clearly projects the edges of the target.

Display unit
OP-84483

This is useful when the travel range cannot be viewed on the main unit screen.

Measurement module delivering even greater ease of use
VHX-H3M3

Wide range of measurements

Includes distance between 2 points, radius, angle and other measurements.

Real-time screen display

Displays XYZ measurement results on the monitor in real time.
Wide-area image capture

A wide-area image, captured at low magnification and recorded, can be used as a reference when navigating at high magnification, allowing the measurement points to be tracked across the entire image.

KEYENCE optical lenses are continuously evolving

VHX-7100

Fully-Integrated camera and High resolution lens delivering the highest image quality at magnifications from 20 to 6000×

Fully-Integrated (FI) Head VHX-7100

With four dedicated objective lenses and built-in lighting (motorized aperture), this unit combines high (NA 0.9) resolution with a large depth of field and is designed for even more outstanding operability.

[2] Number when depth of field is prioritized. Depth will vary according to aperture ring.

Wide-Range Zoom Lens VH-Z100R/Z100T

100 ▶ 1000

Combines high resolution with outstandingly large depth of field

A lens that offers magnified observation with high resolution, combined with a large depth of field. These contradictory needs are met by this innovative zoom lens.

Model		VH-Z100R/Z100T					
Magnification[1]		100×	200×	300×	500×	700×	1000×
Image capture range (mm inch)	H (Horizontal)	3.05 0.12"	1.53 0.06"	1.02 0.04"	0.61 0.024"	0.44 0.017"	0.30 0.012"
	V (Vertical)	2.28 0.09"	1.14 0.04"	0.76 0.030"	0.46 0.018"	0.33 0.013"	0.23 0.009"
	D (Diagonal)	3.81 0.15"	1.90 0.07"	1.27 0.05"	0.76 0.030"	0.54 0.021"	0.38 0.015"
Observation distance (mm inch)		25 (20[2]) 0.98" (0.79")					

[1] Magnification with a 1/2-inch CCD camera on a 15-inch monitor
[2] With triple illumination adapter mounted

Dual-Light High-Magnification Zoom Lens VH-Z250R/Z250T

250 ▶ 2500

Switching between coaxial and ring illumination takes just one touch of a button

Allows illumination to be selected to suit the target, and enables darkfield observation at magnifications up to 2500×. Surface condition, coloring, and other factors can be observed clearly.

Bright-field	Dark-field

Model		VH-Z250R/Z250T						
Magnification*		250×	300×	500×	1000×	1500×	2000×	2500×
Image capture range (mm inch)	H (Horizontal)	1.22 0.05"	1.02 0.04"	0.61 0.024"	0.31 0.012"	0.2 0.008"	0.15 0.006"	0.12 0.005"
	V (Vertical)	0.92 0.036"	0.76 0.030"	0.46 0.018"	0.23 0.009"	0.15 0.006"	0.11 0.004"	0.09 0.0035"
	D (Diagonal)	1.52 0.06"	1.27 0.05"	0.76 0.030"	0.38 0.015"	0.25 0.010"	0.19 0.007"	0.15 0.006"
Observation distance (mm inch)		6.5 0.26"						

*Magnification with a 1/2-inch CCD camera on a 15-inch monitor

High-Resolution Zoom Lens VH-Z500R/Z500T

500 ▶ 5000

Observation distance of 4.4 mm 0.17" throughout magnification range of 500× to 5000×

Delivers high resolution and enables observation at up to 5000×. With its intelligent approach to 3D display, this zoom lens defies the conventional wisdom of microscope observation.

Model		VH-Z500R/Z500T				
Magnification*		500×	1000×	2000×	3000×	5000×
Image capture range (μm)	H (Horizontal)	610	305	152	102	61
	V (Vertical)	457	229	114	76	46
	D (Diagonal)	762	381	191	127	76
Observation distance (mm inch)		4.4 0.17"				

*Magnification with a 1/2-inch CCD camera on a 15-inch monitor

TRIPLE R-compliant lenses are fitted with automatic lens- and magnification-recognition units.

Advanced Microscope Functions in an Easy-to-Use Package.

Base model
VHX-970FN

Functions for viewing, capturing, and measuring
are easy to use, so that even novice users can
operate the VHX-970FN.

Large Depth of Field

Provides 20 times the depth of field compared with optical microscopes.

View, Capture, and Measure with Just One Device

By integrating the optics, camera, electronics, and software, users can perform
complete inspection and analysis with a single device.

Free-Angle Observation

Tilt and adjust the position of the lens and camera to easily view an object from
any angle.

Depth Composition and 3D Display Functions

Capture fully focused images, even for targets with uneven surfaces.

Free-angle observation system
VH-S30F/S30B

Easy Adjustment

Easy X-Y stage movement and rotation. Our eucentric design ensures that the target stays centered in the field of view even if the lens unit is tilted or rotated.

Quick Setup Marks

The lens setting positions, which vary between lenses, are indicated by guide marks. This enables quick lens changes.

Cable Holder

Eliminates vibration transmitted from the cable. Also secures cable, decreasing abrasion and wear on cable.

Vibration-Proof Rubber

Absorbs low-to-high frequency vibrations, so users can perform stable imaging at all magnifications.

High-Stability Frame

The die-cast main body provides a high-rigidity structure with a low center of gravity that allows for highly stable observations.

	Multi-lighting function	Yes	No
	Optical Shadow Effect Mode function	Yes	No
	Camera-shake correcting function	Yes	Yes
Display function	Full-screen display function	Yes	Yes
	Split-screen function	Functions for tiling screens horizontally, vertically, into quarters, into ninths, and interlocking display	Functions for tiling screens horizontally, vertically, into quarters, into ninths, and interlocking display
	Real-time digital zoom	1.0x to 10.0x	1.0x to 10.0x
	Comment display function	Yes	Yes
Image enhancement function	Glare removal function	Yes	Yes
	Ring-reflection removal function	Yes	No
	HDR function	Yes	No
	Fine-Shot function	Yes	Yes
Stitching function	2D image stitching	Yes	No
	3D image stitching	Yes	No
	Navigation function	Yes	No
3D function	Real-time depth composition function	Yes	No
	Quick composition & 3D function	Yes	Yes
	High-quality depth composition	Yes	Yes
	3D display function	Yes	Yes
	3D shape correction function	Yes (Slope/Sphere/Cylinder)	Yes (Slope/Sphere/Cylinder)
	3D comparison function	Yes (Combination/Comparison/Difference display mode)	Yes (Combination/Comparison/Difference display mode)
Recording function	Report output (Excel)	Yes	Yes
	Capture condition reproduction function	Yes	Yes
	Timer capture function	Yes	Yes
	Video recording/ playback function	Max speed: 50 FPS; *Video size when using VHX-7020 (2880 × 2160, 2048 × 1536, 800 × 600, 640 × 480)	Max. speed: 30 FPS; Video size (2048 × 1536, 800 × 600, 640 × 480)
Measuring functions	Distance, angle, radius, area etc.	Yes, various	Yes, various
	Automatic edge detection	Yes	Yes
	Scale display	Yes, various	Yes, various
	Automatic count, area measurement function	Yes (length/area can be measured using brightness/color extraction)	Yes (length/area can be measured using brightness/color extraction)
	Automatic area measurement	Yes	No
	Grain size analysis	Yes	No
	Contamination analysis	Yes	No
	One-click measurement	Yes	No
	Auto-measurement teaching	Yes	No
	Auto measurement	Yes	No
	Automatic lens/zoom recognition function (Triple 'R')	Yes	Yes
	Auto-calibration	Yes (numerical input not required)	Yes (numerical input not required)
	One-push calibration function	Yes (scale position adjustment not required)	No
	CSV storage	Yes	Yes
3D measurement function (VHX-H5M optional function)	3D profile measurement	Yes	Yes
	Point height measurement	Yes	Yes
	3D volume measurement	Yes	Yes
	Roughness measurement	Yes	Yes
Manual XY Measurement System (VHX-H3M3 optional function)	XY stage measurement	Yes	Yes
	Wide image display function	Yes	Yes
Utilities	Easy menu	Yes	Yes
	Space-saving single unit	Yes	Yes
	Foot switch compatibility	Yes	Yes
	User-specific setting memory	Yes	Yes
	System protection setting	Yes	Yes
	PC mode	Yes	Yes
	Network connection function	Yes (communication software, file sharing, FTP)	Yes (communication software, file sharing, FTP)
	Function guide	Yes	Yes
	Video help	Yes	Yes
PC software (available free of charge)	Communication software	Enables easy transmission of image data between VHX system and PC. (LAN)	Enables easy transmission of image data between VHX system and PC. (LAN)
	3D image playback software for the PC	Enables 3D images saved on VHX to be played back in 3D on the PC.	Enables 3D images saved on VHX to be played back in 3D on the PC.
	Optical Shadow Effect Mode playback software	Enables parameter adjustment on Optical Shadow Effect Mode images saved on the VHX system.	No
	Multi-lighting playback software	Multi-lighting images saved on the VHX can be played back later with the lighting direction changed.	No
	HDR playback, measurement, stitched image playback software	Enables HDR parameter adjustment, display of stitched images, measurement.	Enables measurement on the PC.
	One-click measurement compilation software	Enables one-click measurement result compilation and export to Excel.	No
