

## **MULTIPLE FACULTY POSITIONS** **Department of Industrial Engineering** **University of Pittsburgh**

The Department of Industrial Engineering at the University of Pittsburgh anticipates multiple openings for tenure-track faculty positions at the Assistant Professor level. Candidates for senior positions will also be considered. Our primary area of interest is Decision and Risk Analysis; however, outstanding candidates in related areas of operations research and operations management, broadly construed, will be considered.

Candidates should possess a Ph.D. in Industrial Engineering, Operations Research, or a related field by Fall 2010, have a strong methodological background, and an interest in applications. We encourage cutting-edge and interdisciplinary research. Our primary search criterion is research potential. Senior candidates must have established an outstanding research record commensurate with rank.

The Department offers a progressive and innovative undergraduate program with 150-180 students, a vibrant professional masters program, and a rigorous doctoral program with approximately 40 Ph.D. students. About half of our Ph.D. graduates assume positions in academia upon completion. For more information about the Department, please visit our webpage: <http://www.ie.pitt.edu>. We are also seeking faculty candidates in manufacturing and design; please see our webpage for more information.

Review of applications will begin immediately; however, applications will be accepted until the positions are filled. Please email a resume, copies of up to five research papers, research and teaching statements and a list of four references to:

Faculty Search Committee
